

SUPER LUMINANCE LED

With our break through technology, the LED has become brighter and more intensified than ever.

Our high performance built-in reflector collects all emissions of LED and precisely directs to single spot. Virtually no emission is wasted. As a result, it realizes 2 to 5 times more intensified radiance compared to ordinary LED.

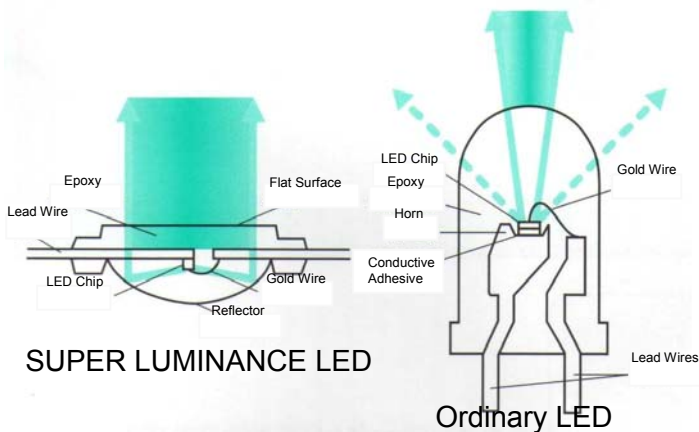

Feature

- Parallel radiation
- CAD-designed high performance built in reflector
- High Intensity
- Low Profile and flat surface
- High reliability
- High illuminance uniformity

Application

- Indoor/Outdoor Indicators
- Automobile
- Photoelectric switches
- Office automation equipment
- Display units
- Image processing devices
- Various sensing devices

Optical structure

Beam distribution
